Overview

I am an internationally recognized authority on victimization, trauma, and resilience, best known for my work in violence measurement, polyvictimization, and resilience. I am ranked in the top 1% out of more than 6 million published researchers in 22 disciplines and 176 subdisciplines using citation metrics from 2019 data, according to a 2020 analysis by Stanford University that includes retired and deceased researchers.*

An award-winning scholar, I have more than 28,000 lifetime citations and my h-index is 67 (67 publications cited at least 67 times each according to Google Scholar). I have given more than 75 invited talks and my work has appeared in hundreds of media outlets. Trained as a clinical psychologist, other career highlights include serving as Founding Editor of the American Psychological Association (APA) journal *Psychology of Violence*; Founder of ResilienceCon; term on the Board of Scientific Counselors for the National Center for Injury Prevention & Control, U.S. Centers for Disease Control & Prevention (CDC); co-investigator of the National Surveys of Children's Exposure to Violence; and development of the Resilience Portfolio Model. My awards include Outstanding Contribution to the Science of Trauma Psychology from APA. My next book, with Victoria Banyard, is entitled *Strengths-Based Prevention: Reducing Violence & Other Public Health Problems* (APA Books, forthcoming November 2021).

Education:

University of North Carolina at Chapel Hill
Harvard Medical School

Ph.D. in Clinical Psychology, 1992
Clinical Fellow in Psychiatry,
McLean Hospital, 1991-1992
M.A. in Psychology, 1989
B.S. in Psychology, 1985

College of William and Mary, Williamsburg, VA

Professional Positions:

2012-present Director, Life Paths Research Center, Sewanee, TN
2015-present Founder and Co-Chair, ResilienceCon
2008-present Department of Psychology, Sewanee, the University of the South
2012-present Research Professor
2008-2012 Research Associate Professor
2002-2011 Research Associate Professor, Department of Psychology, University of North Carolina at Chapel Hill (UNC-CH)
2006-2010 Professeur Invité, Faculté de droit et sciences criminelles (Department of Law & Criminology), Université de Lausanne, Switzerland
2002-2008 St. Andrews University, Laurinburg, NC
2007-2008 Visiting Associate Professor
2002-2007 Visiting Faculty in Psychology
1994-2001 Family Research Laboratory, University of New Hampshire

* Ioannidis et al., 2020; <https://journals.plos.org/plosbiology/article?id=10.1371%2Fjournal.pbio.3000918>)

	1999-2001	Research Assistant Professor
	1998-1999	Research Scientist
	1994-1996	NIMH Postdoctoral Research Fellow
1997-1999	Visiting Scientist, Arizona Prevention Center, University of Arizona, Tucson	
1996-1998	Clinical and Research Psychologist, San Carlos Apache Tribe, San Carlos, AZ	
1993-1994	Visiting Adjunct Assistant Professor, Department of Psychology, UNC-CH	
1992-1994	Postdoctoral Fellow, Department of Neurology, UNC-CH School of Medicine	

Contributions to Science

(with selected references from more than 200 scholarly publications; * indicates mentored student, intern, or fellow)

1. **Polyvictimization.** One of the most important concepts to emerge in the last 20 years of violence research has been the importance of dose—the cumulative burden of lifetime victimization. My colleagues and I call this concept polyvictimization (dose of different types of victimization). Many forms of violence have traditionally been studied in isolation, such as bullying and child abuse. However, our research showed that all forms of victimization are closely interconnected and that adverse consequences, such as trauma symptoms, are primarily due to the total dose, rather than the experience of any single type of victimization. I have served as principal investigator and co-investigator on grants for this line of research.

2. **Strengths-based approaches to resilience following adversity.** My colleagues and I have developed a new theoretical framework around the concept of “resilience portfolios.” Resilience portfolios focus on identifying the key strengths and strength domains—especially at outer layers of the social ecology—that are needed to thrive after victimization and other adversity. As part of this effort, I conducted the largest psychological study, on any topic, ever completed in rural Appalachia. With this project, I extended measurement development to the crafting and adaptation of numerous strengths-based measures at several levels of the social ecology. This work has been extended across multiple grants. I serve as the PI on these projects.

3. **A comprehensive epidemiology of child victimization in the United States.** Surprisingly, before the National Survey of Children’s Exposure to Violence, there was not any national effort to monitor crimes against children under age 12 that were not reported to authorities. This is all the more surprising given the establishment of several other violence surveillance systems in the last 50 years (e.g., National Criminal Victimization Survey, National Intimate and Sexual Violence Survey). Part of the problem was lack of a methodology for comprehensive surveillance. As part of this surveillance program, we developed the Juvenile Victimization Questionnaire. We have now conducted 4 nationally representative surveys that established that childhood is a primary period of vulnerability to victimization (60% yearly incident rate for all forms of victimization) and track trends in victimization. I served as the co-investigator in these studies and took the lead in

instrument development. This research served as the foundation for a similar study in the UK led by Professor Lorraine Radford of the Connect Centre, as well as numerous other studies worldwide.

4. **Improving assessment & services for intimate partner violence.** The scientific study of violence was revolutionized by the recognition, in the 1960s and 1970s, that people would disclose violence that had not been reported to authorities on confidential questionnaires. Survey technology allowed us to recognize that violence is a major public health problem that inflicts a substantial societal burden in medical and other costs. However, accurate assessment of this sensitive topic remains challenging. My contributions include revising the Conflict Tactics Scales, the most widely used IPV measure, to include sexual coercion and injury. More recently, I embarked on a series of experiments to improve multimethod convergence of IPV self-report with other indicators, especially with regard to gender patterns. I have also contributed to research on services for victims, serving as principal investigator or co-investigator.

OJJDP & CDC Finkelhor & Turner (co-PI) 2002-2016

National Surveys of Children's Exposure to Violence

Since 2002, David Finkelhor, Heather Turner and I have conducted 4 nationally representative studies on youth victimization, co-sponsored by the Office of Juvenile Justice and Delinquency Prevention and the Centers for Disease Control. These are the U.S.'s primary surveillance of victimization against youth that is not reported to authorities, including the only nationally representative figures for numerous forms of victimization, including statutory rape, exposure to shootings and riots, and several other forms of victimization, crime, and abuse. It is also the only national surveillance for most forms of victimization against children under the age of 12. This program has received multiple grants:

2015-2016. "Supplemental Analyses of the National Surveys of Children's Exposure to Violence"

2012-2015. "National Study of Children Exposed to Violence III: Trend Study"

2010-2013. "National Study of Children Exposed to Violence II: Trend Study"

2008-2011. "National Study of Children Exposed to Violence: Follow-Up Study"

2006-2011. "National Study of Children Exposed to Violence"

2002-2008. "Developmental Victimization Survey, Waves I, II and III"

Role: Co-Investigator

2010-IJ-CX-0021, NIJ Finkelhor (PI) 1/01/11-9/30/14

National Study of Children Exposed to Violence: Assessing Exposure to Family Violence

The goal of this study is to obtain data on the experiences of a nationally representative sample of 525 children who have been exposed to family violence in the previous year. The project will: 1) describe the law enforcement response, service system response and family response to the episodes of family violence as they relate to the exposed children; 2) analyze children's and parents' judgments about the positive and negative features of law enforcement and service system response; and 3) determine whether law enforcement, service system and family system responses were associated with higher or lower levels of current distress among the exposed children.

Role: Co-Investigator

Optimus Foundation Finkelhor (PI) 2011-2013

Ethical Issues in Conducting Epidemiological Surveys on Child Victimization and Abuse

Investigate effects on children of survey research participation.

Role: Co-investigator

Selected Awards and Honors:

- 2021 Honorable mention, Richard P. Kluff Award for *Journal of Trauma & Dissociation* 2020 Best Article. For:
 Hamby, S., Taylor, E., Mitchell, K., Jones, L., & Newlin, C. (2020). Poly-victimization, trauma, and resilience: Exploring strengths that promote thriving after adversity. *Journal of Trauma & Dissociation*, 21(3), 376–395.

Life Paths Research Center

At my current research center, Life Paths, I have 13 affiliated researchers at various institutions around the country, a listserv (ResComm for Resilience Community) with approx. 400 members, and an annual conference, ResilienceCon with > 200 attendees. I have mentored more than 50 students, fellows, and other junior researchers. <https://lifepathsresearch.org>

I have given invited colloquia, grand rounds, or workshops at more than 75 institutions, including Brown University, Pennsylvania State University, University of Kentucky, University of Michigan, Cornell University, U.S. Office of Juvenile Justice and Delinquency Prevention, Indian Health Service, National Children's Advocacy Center, Association of International Schools in Africa, National Society for the Prevention of Cruelty to Children (NSPCC), Universidad de la Laguna, Université du Québec à Montréal, Université de Lausanne, and University of the Witwatersrand.
